

(2) information, in both English and Spanish, and accessible to persons with disabilities, concerning—

(A) the digital television transition, including the fact that a transition has taken place and that additional action is required to continue receiving television service, including emergency notifications; and

(B) the steps required to enable viewers to receive such emergency information via the digital television service and to convert to receiving digital television service, including a phone number and Internet address by which help with such transition may be obtained in both English and Spanish; and

(3) such other information related to consumer education about the digital television transition or public health and safety or emergencies as the Commission may find to be consistent with the public interest.

#### SEC. 3. LIMITATIONS.

In designing the program required by this Act, the Commission shall—

(1) take into account market-by-market needs, based upon factors such as channel and transmitter availability;

(2) ensure that broadcasting of the program specified in section 2(b) will not cause harmful interference with signals in the digital television service;

(3) not require the analog television service signals broadcast under this Act to be retransmitted or otherwise carried pursuant to section 325(b), 338, 339, 340, 614, or 615 of the Communications Act of 1934 (47 U.S.C. 325(b), 338, 339, 340, 614, or 615);

(4) take into consideration broadcasters' digital power levels and transition and coordination plans that already have been adopted with respect to cable systems and satellite carriers' systems;

(5) prohibit any broadcast of analog television service signals under section 2(b) on any spectrum that is approved or pending approval by the Commission to be used for public safety radio services, including television channels 14-20; and

(6) not include the analog spectrum between channels 52 and 69, inclusive (between frequencies 698 and 806 megahertz, inclusive) reclaimed from analog television broadcasting pursuant to section 309(j) of the Communications Act of 1934 (47 U.S.C. 309(j)).

#### SEC. 4. DEFINITIONS.

As used in this Act, the term "emergency information" has the meaning such term has under part 79 of the regulations of the Federal Communications Commission (47 C.F.R. part 79).

The bill (S. 3663), as amended, was ordered to be engrossed for a third reading, was read the third time, and passed.

#### AUTHORIZING THE USE OF EMANCIPATION HALL

Mr. DORGAN. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of H. Con. Res. 435 received from the House.

The PRESIDING OFFICER. The clerk will report the concurrent resolution by title.

The legislative clerk read as follows:

A concurrent resolution (H. Con. Res. 435) authorizing the use of Emancipation Hall on December 2, 2008, for ceremonies and activities held in connection with the opening of the Capitol Visitor Center to the public.

There being no objection, the Senate proceeded to consider the concurrent resolution.

Mr. DORGAN. Mr. President, I ask unanimous consent that the concurrent resolution be agreed to, the motions to reconsider be laid upon the table, and that any statements related to the concurrent resolution be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The concurrent resolution (H. Con. Res. 435) was agreed to.

#### THE ADOPTION OF BLUEFIN TUNA CONSERVATION AND MANAGEMENT MEASURES

Mr. DORGAN. Mr. President, I ask unanimous consent that the Commerce Committee be discharged from further consideration of S. Res. 709 and the Senate proceed to its immediate consideration.

The PRESIDING OFFICER. The clerk will report the resolution by title.

The legislative clerk read as follows:

A resolution (S. Res. 709) expressing the sense of the Senate that the United States should pursue the adoption of bluefin tuna conservation and management measures at the 16th Special Meeting of the International Commission on the Conservation of Atlantic Tunas.

There being no objection, the Senate proceeded to consider the resolution.

Mr. DORGAN. Mr. President, I ask unanimous consent that the resolution be agreed to, the preamble be agreed to, the motions to reconsider be laid upon the table with no intervening action or debate, and any statements related to the resolution be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution (S. Res. 709) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

#### S. RES. 709

Whereas Atlantic bluefin tuna fishery is valuable commercially and recreationally in the United States and many other countries;

Whereas the International Convention for the Conservation of Atlantic Tunas entered into force on March 21, 1969;

Whereas the Convention established the International Commission for the Conservation of Atlantic Tunas to coordinate international research and develop, implement, and enforce compliance of the conservation and management recommendations on the Atlantic bluefin tuna and other highly migratory species in the Atlantic Ocean and the adjacent seas, including the Mediterranean Sea;

Whereas in 1974, the Commission adopted its first conservation and management recommendation to ensure the sustainability of Atlantic bluefin tuna throughout the Atlantic Ocean and Mediterranean Sea, while allowing for the maximum sustainable catch for food and other purposes;

Whereas in 1981, for management purposes, the Commission adopted a working hypothesis of 2 Atlantic bluefin tuna stocks, with 1 occurring west of 45 degrees west longitude (hereinafter referred to as the "western Atlantic stock") and the other occurring east of 45 degrees west longitude (hereinafter re-

ferred to as the "eastern Atlantic and Mediterranean stock");

Whereas, despite scientific recommendations intended to maintain bluefin tuna populations at levels that will permit the maximum sustainable yield and ensure the future of the stocks, the total allowable catch quotas have been consistently set at levels significantly higher than the recommended levels for the eastern Atlantic and Mediterranean stock;

Whereas despite the establishment by the Commission of fishing quotas based on total allowable catch levels for the eastern Atlantic and Mediterranean bluefin tuna fishery that exceed scientific recommendations, compliance with such quotas by parties to the Convention that harvest that stock has been extremely poor, most recently with harvests exceeding such total allowable catch levels by more than 50 percent for each of the last 4 years;

Whereas insufficient data reporting in combination with unreliable national catch statistics has frequently undermined efforts by the Commission to assign quota overharvests to specific countries;

Whereas the failure of many Commission members fishing east of 45 degrees west longitude to comply with other Commission recommendations to conserve and control the overfished eastern Atlantic and Mediterranean bluefin tuna stock has been an ongoing problem;

Whereas the Commission's Standing Committee on Research and Statistics noted in its 2006 report that the fishing mortality rate for the eastern Atlantic and Mediterranean stock may be more than 3 times the level that would permit the stock to stabilize at the maximum sustainable catch level, and continuing to fish at the level of recent years "is expected to drive the spawning biomass to a very low level" giving "rise to a high risk of fishery and stock collapse";

Whereas the Standing Committee's 2008 report recommended that the annual harvest levels for eastern Atlantic and Mediterranean bluefin tuna be reduced from 32,000 metric tons to 15,000 metric tons or less to halt decline of the resource and initiate rebuilding;

Whereas the Standing Committee has stated that time and area closures could greatly facilitate the implementation and monitoring of rebuilding strategies and recommended a closure of the Mediterranean Sea in May, June, and July, as well as a minimum size limit of 25 kilograms;

Whereas in 2006, the Commission adopted the "Recommendation by ICCAT to Establish a Multi-Annual Recovery Plan for Bluefin Tuna in the eastern Atlantic and Mediterranean" containing a wide range of management, monitoring, and control measures designed to facilitate the recovery of the eastern Atlantic and Mediterranean bluefin tuna stock;

Whereas the Recovery Plan is inadequate and allows overfishing and stock decline to continue, and initial information indicates that implementation of the plan in 2007 by many eastern Atlantic and Mediterranean bluefin tuna harvesting countries has been poor;

Whereas since 1981, the Commission has adopted additional and more restrictive conservation and management recommendations for the western Atlantic bluefin tuna stock, and these recommendations have been implemented by Nations fishing west of 45 degrees west longitude, including the United States;

Whereas despite adopting, fully implementing, and complying with a science-based rebuilding program for the western Atlantic bluefin tuna stock by countries fishing west
